

 .gitignore	basic gitignore	Oct 29, 2013
 LICENSE	Initial commit	Oct 29, 2013
 README.md	Added link to get back to the github repos.	Nov 8, 2013
 index.html	upgrade to mdwiki 0.5.8	Nov 29, 2013
 index.md	Migrate in linux blind files, update to contributors	Nov 11, 2013
 links.md	Fix a small typo in links.md	Nov 1, 2013
 navigation.md	Adding Google Doc Linux Content.	Nov 19, 2013

README.md

Post Exploitation Wiki

This wiki is powered by MDwiki which is a self contained wiki in a single HTML file.

All you have to do to use the wiki is clone the repo to anywhere you can open HTML, served or local.

Contributors please see here: <https://github.com/mubix/post-exploitation-wiki/wiki/Contributor-Wiki>

Live Online Copy:

You can find a copy of the project online at: <http://mubix.github.io/post-exploitation-wiki/>. If you are reading this from the live website and want to get to the Github repository click here -> <https://github.com/mubix/post-exploitation-wiki>.

Offline Use:

1. Clone the repository or pull the archive ([download zip](#)) of the repo
2. Open index.html
3. Most modern browsers don't allow the access of local files from a locally loaded HTML file. On Windows you can use [Mongoose Tiny](#) or [HFS](#) to host the files locally. On OSX and Linux `python -m SimpleHTTPServer` seems to work just fine.

Reference Binaries:

If the binary referenced isn't built into the respective OS, can be found here: <https://github.com/mubix/post-exploitation>

Known issue with Chrome:

Chrome doesn't allow local file access from local files loaded in the browser (ala index.html loading index.md). There are two ways around this. Use a web server to host it (Apache, nginx, python SimpleHTTPServer, etc) or start Chrome with the `--allow-file-access-from-files` argument. See here for more details: <http://dynalon.github.io/mdwiki/#!faq.md>
